

## Sunrise at Frogmal House

"Our sensory room was installed with enthusiasm and care by a very friendly group. Anything which was damaged in transport was replaced in record time. The sensory equipment has provided our seniors with a calming area to relax in; a stimulating area for those further down the journey of Dementia, and a room in which relatives can relax with their loved one whilst sharing the sensory experience. The equipment blends into the room, not standing out garishly or looking frightening. The range of equipment and the range of colours available was beyond belief!! A fantastic service I have no doubt we will use again in the future"

Our residents are now using the sensory room and it has gone down like i cannot describe!! We are really pleased with it!
